Credit Name: CSE 2110 Procedural Programming 1
Assignment Name: Add Coins Mastery Project

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

1. **Incorrect Total Calculation**
   - **Cause:** I had extra parentheses that caused an incorrect sum in getDollarAmount.
   - **Solution:** I removed the unnecessary parentheses to fix the calculation.
2. **Dollar Output Formatting Issue**
   - **Cause:** The total displayed with too many decimal places.
   - **Solution:** I Used a String.format("%.2f", totalAmount) to limit the total display to two decimal places.
3. **Scanner Not Closed**
   - **Cause:** There was a Warning about an unclosed Scanner.
   - **Solution:** I added scanner.close(); at the end of main to prevent resource leaks.
