Credit Name: CSE 2140 2nd Language Programming
Assignment Name: Guessing Game Mastery Project

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

When I was writing the code for the 1-20 range I wrote this which gave me a range of 0-19:

```
int secretNumber = random.nextInt(20);
```

I realized my mistake after some research that nextInt(n) generates a range of (0, n-1).

To fix this, all I had to do was shift the range up by 1:

```
int secretNumber = random.nextInt(20) + 1;
```
