Credit Name: CSE 2140 2nd Language Programming
Assignment Name: E11 Project

Decribe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

```
float p4 = (float)(t4*100)/tt);
```
I had a syntax error where each 'P' line of code was not doing anything.
```
float p3 = (float)((t3*100)/tt);
```
I simply add an additional bracket to the 't#' side which fixed the issue
